Vinyl flooring offers the ideal solution for modern living. With its stylish designs, robust durability, and easy maintenance, it's perfect for busy homes, professional spaces, and everything in between.

security first

The world is hectic and sometimes full of stress, but your home shouldn't be. Choose secure, worry-free living with your C-QR floor. Quality you can trust, and designed for ease and comfort. Because a secure home is a happy home. Enjoy the comfort of living with C-QR.

QUIET

The elastic surface of C-QR floors dampens footsteps and vibrations - for pleasant room acoustics.

EASY TO CARE FOR

For reliable protection: The surface is completely sealed with a high-quality acrylic coating. Stains and dirt can be easily removed by sweeping, vacuuming or damp mopping.

WARM

C-QR floors feel cozy and soft - ideal for walking barefoot.

HIGH DURABILITY

C-QR floors are particularly hard-wearing thanks to their special wear layer.

SUITABLE FOR UNDERFLOOR HEATING SYSTEMS

Due to their good thermal conductivity, edge floors are ideally suited for installation on underfloor heating systems.

C-QR modular is a vinyl floor covering that is glued directly to the subfloor. Among other things, it can also be used for rooms with hot water underfloor heating.

C-QR modular flooring offers a wide range of authentic wood surfaces in plank format and various stone surfaces in the form of extra large tiles. Our surfaces have a high wear layer and are treated with **Matecta®** surface protection, which gives them extra durability.

The special feature of **C-QR modular** is its super-flexible vinyl fabric with elastic properties. This makes the flooring easy to handle and install, as well as providing a comfortable walking and standing surface.

Since the vinyl floor is firmly glued down, it is also suitable for areas with higher demands, such as commercial spaces or heavily frequented areas in residential buildings, but of course the floor can also be installed very well in private areas.

Another advantage of **C-QR modular** is its low installation height, which means that the flooring takes up very little room height and can therefore also be used in rooms with limited ceiling height.

C-QR modular is made from recyclable materials and is therefore recyclable. It therefore contributes to sustainability and can be recycled at the end of its life.

laying technology modular

Complete bonding with commercially available wet bed adhesives.
